Step 1 — Move steering wheel and seat to desired location

- Move steering wheel and seat to desired working position

⚠ It is required in the next step to disconnect the battery, so it is important to have the seat and steering wheel in a good working position
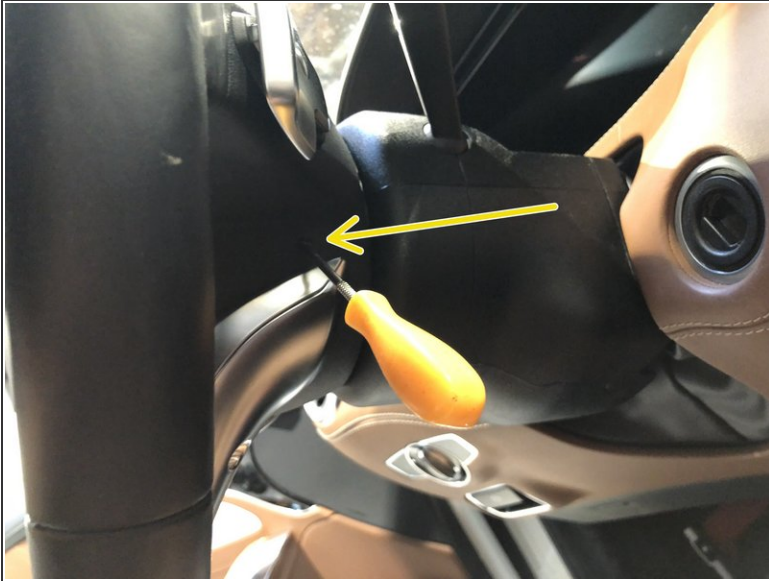

Step 2 — DISCONNECT VEHICLE BATTERY

⚠ Vehicle battery must be disconnected before moving to the next step

📌 The airbag will be removed in the next step, so it is very important to disconnect the vehicle battery before removing the airbag
